

Atmos Energy is the largest pure natural gas distributor in the United States. Atmos serves over 3.1 million customers in 12 states, including almost 5,000 customers in Union City.

Atmos has a broad range of rates schedules available for large commercial and industrial customers, including Firm, Interruptible, Transportation and an Economic Development Gas Service. In addition, Atmos has an incentive rate schedule for Cogeneration, Large Tonnage Gas Air Conditioning, Compressed Natural Gas, Prime Movers and Fuel Cells.

Natural gas service into Atmos' Union City service area is provided by dual, high pressure feeds from Texas Gas Transmission Pipeline. This dual feed provides not only increased reliability, but offers plenty of capacity for large commercial and industrial growth in Union City.

Atmos Energy's nonutility operations are ranked as one of the leading domestic mid-tier gas marketers. They market natural gas supplies to industrial customers and municipalities in 22 states, arrange for gas transportation and management services and manage company-owned gas storage and pipeline assets.

The Atmos Energy web site can be used to view and pay bills online, see usage and payment history, sign up for service or contact a representative. Customers with Electronic Telemetering can even view their daily gas volumes via the web site
