ABOUT THE PROGRAM OF STUDY

The Mechatronics program of study is designed for students interested in becoming a mechatronics technician, electrical technician, mechanical engineering technician, robotics technician, or mechatronics engineer. Course content focuses on the components of manufacturing systems, collection and analysis of quality data, electronics, mechanics, fluid power systems, computers and control systems, and technical documentation and troubleshooting. Upon completion of this program of study, proficient students will be prepared to pursue industry certification at a technology college or more advanced coursework at a two-year or four-year postsecondary institution.

Industry Certification options include:
- OSHA10 Safety Certification
- Level I Siemens Certified Mechatronic Systems Assistant
- Snap-On Precision Measurement

High School Mechatronics Program of Study

Industry Certification
- Machining Level I - Measurement, Materials, and Safety Certification (NIMS)
- Siemens Level 1 Certified Mechatronic Systems Assistant

Early Postsecondary
Dual credit/enrollment may be established with local postsecondary institutions

Motlow State Community College
- Siemens Level 2 Certified Mechatronics Systems Associate
- A.S., Mechatronics Technology
- Middle Tennessee State University
- University of Tennessee at Martin
- B.S., Mechatronics Engineering

TCAT
- Mechatronics Technology
- Mechatronics

Roane State
- Mechatronics

Dyersburg State
- Mechatronics: Industrial Electricity
- Mechatronics: Programmable Logic Controller

This is not an exhaustive list of all of the opportunities available in Tennessee.
CAREER OPPORTUNITIES

Mechatronics is the study of complex systems and processes to aid in smarter, more efficient product design and development, particularly within manufacturing environments. Mechatronics systems combine mechanical, electrical, computer, and control systems into a unified process, drawing on principles of industrial engineering and related disciplines to optimize results and minimize defects. Examples of classic mechatronics systems within automotive manufacturing environments include the mobile robots and manipulator arms that operate on assembly lines.

Employment Projections for Mechatronics careers in Tennessee

SkillsUSA

Students in this program of study will be eligible to join SkillsUSA. In addition to school events, students will be able to compete at the regional, state, and national level. SkillsUSA improves the quality of America’s skilled workforce through a structured program of citizenship, leadership, employability, technical and professional skills training. SkillsUSA enhances the lives and careers of students, instructors and industry representatives as they strive to be champions at work. See your manufacturing teacher to learn more about SkillsUSA or visit http://www.skillsusa.org

TENNESSEE Promise

College of Applied Technology (TCAT), community college, or some two-year university programs for free! To learn more, please see your school counselor or visit http://www.tennesseepromise.gov.

Have you registered for the Tennessee Promise? Seniors enrolled in this program have the chance to attend a two-year program at a Tennessee
